SUMMARY

Forward Deployed Engineer who turns customer problems into production AI agents and owns the outcome after launch. As founding engineer and now CTO at Avenuor, I took the platform from zero to production, including AI document processing, a RAG assistant and agentic workflows. Before that, I delivered AI and full-stack systems for healthcare and international clients, working directly with stakeholders from discovery to deployment. Top Rated Plus on Upwork with 100% Job Success.

EXPERIENCE

Chief Technology Officer & Founding Engineer | Avenuor *Apr 2026 – Present*

- Built the Avenuor platform from zero to production as founding engineer, owning architecture, full-stack development, AI and infrastructure; promoted to CTO in July 2026.
- Worked with users to map manual invoice and document handling, then deployed an AI extraction engine and automated document processing pipelines to remove it.
- Shipped a RAG assistant grounded in company documents, plus natural-language interfaces and automation workflows.
- Own the end-to-end architecture: Python and Node.js services, PostgreSQL and MongoDB, secure REST APIs, AWS and Supabase, with staging and production environments and CI/CD.
- Lead a team of developers, designers and QA (code reviews, sprints, hiring); set security standards and supported pre-seed technical due diligence.

Frontend AI Engineer (Full-Stack) | Mediflow 360 · Healthcare / Legal Tech · Remote, US *Jul 2025 – Jul 2026*

- Frontend lead on a personal-injury case platform used by healthcare providers and attorneys, covering patient records, imaging, and the attorney and e-sign lien portals.
- Turned clinical and legal workflow requirements from stakeholders into shipped features, and designed API response schemas with the backend team.
- Contributed Node.js services and shaped system design for performance and scalability.

AI & Full-Stack Engineer (Freelance) | Upwork · Top Rated Plus, 100% Job Success *Mar 2022 – Dec 2025*

- Ran discovery with international clients, scoped unclear problems into clear technical plans, and delivered AI automations and full-stack products end to end.
- Built AI-powered features and workflow automations into client products, alongside web apps, dashboards and APIs (React, Next.js, Angular, Node.js, MongoDB, Firebase).
- Owned client communication, milestones and post-launch support across 10+ projects.

SELECTED AI DEPLOYMENTS

- **AgentOps:** Multi-agent system that turns a Slack request into a Confluence spec, Jira tickets, a GitHub pull request and a live Vercel preview, with human approval steps.
- **Design System MCP Server:** My design system packaged as a Model Context Protocol server, so AI coding agents such as Claude Code and Cursor build on-brand UI in any codebase.
- **Document AI:** Invoice extraction and document pipeline with validation rules and fallbacks, running in production at Avenuor.
- **AI Video Automation:** Claude Code pipeline that turns a topic into a finished, ready-to-post video.

SKILLS

- **AI & Agents:** Multi-agent systems, tool use and function calling, RAG, human-in-the-loop design, MCP, prompt engineering, LLM evaluation, Claude, OpenAI and Gemini APIs, LangChain, Claude Code, OpenClaw, Hermes Agent
- **Integrations & Automation:** Composio, n8n, Mailchimp, CRM management (HubSpot), Slack, Jira and GitHub integrations
- **Back End & Data:** Python, FastAPI, Node.js, Express, TypeScript, REST APIs, PostgreSQL, MongoDB, Supabase, Convex, Firebase, vector databases
- **Cloud & DevOps:** AWS, Docker, CI/CD, Git, GitHub, Bitbucket
- **Front End & UI/UX:** Next.js, React, Angular, Tailwind CSS, UI/UX design, Figma
- **Customer-Facing:** Discovery and requirement scoping, stakeholder demos, technical leadership, Agile

CERTIFICATIONS, EDUCATION & ACHIEVEMENTS

- **Certifications:** Introduction to Subagents (Anthropic, 2026) · Prompt Engineering for AI (Udemy, 2026) · Foundations of AI (Microsoft) · SQL (Oracle)
- **Education:** B.Tech, Computer Engineering, RK University, Rajkot
- **Achievements:** Team Leader, Smart India Hackathon and SSIP Hackathon (2023) · 2nd Runner-Up, Figma Fest UI/UX
